

# Introduction

**Professor Rob Coe,**

Director of Research and Evaluation at  
Evidence Based Education  
and lead author on the Sutton Trust's  
report ['What Makes Great Teaching'](#)

In this module you will hear from Professor Rob Coe, Director of Research and Evaluation at Evidence Based Education and lead author on the Sutton Trust's report ['What Makes Great Teaching'](#), as he explains why assessment should be at the heart of your practice.

You will also hear from assessment experts Stuart Kime and Mick Walker from Evidence Based Education, as they support you to explore ways to give manageable and purposeful feedback to pupils, including how to establish meaningful peer and self-assessment. Finally, you will consider what patterns to look for in data, and what inferences it is possible to make from summative data sets.

Throughout the module there will be opportunities for you to reflect personally on your current practice and consider ways you could enhance the assessment you are already doing.

While engaging with this online content, you will also prepare for weekly interactions with your mentor and your two Module 4 training seminars.
