

Mentor interaction: Early Years: Implementing Sustained Shared Thinking

Now you are going to apply elements of Sustained Shared Thinking to a scripted interaction. In this activity, we ask that you focus on specific elements of Sustained Shared Thinking, which are outlined in the task in the assignment tool.

Over to you!

In your next mentor interaction, you will discuss Sustained Shared Thinking and plan to include this into your practice. In preparation for this complete the activity in the assignment tool where you will be asked to read a script of an interaction between a teacher and a pupil and then extend or amend the teacher's comments to include certain elements of Sustained Shared Thinking. Once you have completed this, you can submit your ideas to your mentor.
