

Choosing the topic of your scheme of work

Throughout module 6 you will be asked to refer to and edit (if it's already existing) or create (if not already existing) a scheme of work that is between 5-10 lessons long. You will be able to apply what you have learnt from each session within this module to your scheme of work so that by the end of the module, you will have a complete scheme of work that is ready to teach to your pupils.

Over to you!

Before you go any further, decide what your scheme of work will be about.

It might make sense for you to select a topic you will be teaching in the following term - this may be the next academic year depending on when you access this module, so that you can teach it after you have completed it during this module. This will also give you the added benefit of being able to review and revise your scheme after teaching it based on how impactful it is to pupils' learning.

If you're not sure about what topic to pick, you will be able to discuss this with your mentor in your first mentor interaction.
